Art Unit: 3682

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the implies phrase "the present invention", and as not sufficiently describing the disclosure.. Correction is required. See MPEP § 608.01(b).

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 5 and 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the trough" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3682

Claim 6 recites the limitation "the trough" in line 4. There is insufficient antecedent basis for this limitation in the claim with respect to the dependencies to claims 3 and 4.

Claim 7 does not appear to further limit the structure of the retainer of claim 1.

Claim 8 is indefinite because it is unclear as to whether the scope of the claims is to include the partitions being made of a wear-resisting flexible material, since this is not positively claimed. That is, the expression "can be made of" does not necessarily mean that it is.

Claims 1, 2, and 4 are allowed.

Claims 3 and 5-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
